

TERAMIND

Insider risk management, employee monitoring and productivity optimization powered by user behavior analytics for business

About

Since 2014, over 10,000 organizations around the world have trusted Teramind to provide insider threat detection, data loss prevention, and business process optimization through behavioral user data. By harnessing behavior analytics, our award-winning platform has helped enterprises in finance, retail, manufacturing, energy, technology, healthcare, and government optimize their workforce and protect their businesses.

What We Offer

Insider Threat Prevention

Counteract data misuse, malicious activity and exfiltration attempts with automated responses that combat insider threats to data

Business Process Optimization

Analyze cohort behavior in specific business processes to identify ways to optimize workflows

Employee Monitoring

Stay ahead of risks threatening sensitive data with comprehensive activity monitoring that alerts admins to suspicious and risky user behaviors

Compliance Management

Stay on top of your compliance management with an automated system that accounts for the human element

User and Entity Behavior Analytics

Keep your enterprise protected in today's complex threat landscape with user and entity behavior analytics validated by machine learning

Behavioral Data Loss Prevention

Strengthen your defensive posture by protecting sensitive data through endpoint telemetry and behavior analytics

Insider threats have risen

44%

over the past two years

-Ponemon Institute

Did You Know?

Insider threats have risen 44% over the past two years

Teramind's highly customizable platform can detect virtually any user activity that happens on an endpoint to protect against insider threats while content-based data exfiltration prevention safeguards sensitive data.
