

vCISO Service

Affordable Cyber Security Leadership for SMEs Without the Overhead

We help IT Managers and Business Owners sleep better at night by giving them the security leadership they need without the cost of a full-time CISO.

Our Virtual CISO (vCISO) service gives SMEs instant access to expert security guidance, GDPR & ISO templates, and 24/7 support.

Why SMEs Need a vCISO

Cyber threats don't care how big your business is. For most SMEs, hiring a dedicated security officer isn't realistic but the risks are very real. A single phishing attack or compliance gap can lead to data loss, downtime, reputational damage, or costly fines.

Our vCISO service gives you the expert leadership, policies, and support you need to build a strong cyber foundation without complexity or heavy overheads.

Build and maintain compliance

Expert advice when you need it

GDPR & ISO 27001 policy templates

24/7 support on Pro plan

Scalable for SMEs with 1–25 employees

How It Works

1. Choose Your Plan – Starter or Pro, depending on your level of support.
2. Get Instant Access – Templates, tools, and expert support, straight away.
3. Secure Your Business – Build a practical, sustainable security strategy.

Plan Summaries

- Perfect for small businesses that want to get compliant and protected quickly.
Includes GDPR & ISO templates, unlimited advice, and regular compliance guidance.
- Ideal for growing SMEs that want hands-on strategic support and 24/7 protection.

Why Choose Be Tech Secure

Trusted by SMEs across the UK

No contracts. No jargon. Just practical support.
